Sprint 6 Planning

11/3/22 - 11/9/22	Work Item(s)	Hours Available to Work	Hours of Work Taken
Sierra Harris	Registration and Logging implementation	12	10
David Chan	I will try to finish the network diagram, testing, and work on registration code.	24	20
Bryant Lam	LL Design Sequence Diagrams for Registration and Logging	16	16
Abhay Solanki	Complete the implementation of Logging	10	10
Faisal AlMuharrami	Registration and Logging implementation	22	22

Sprint 6 Daily Stand-ups

11/3/22	Are you blocked?	What did you do yesterday?	What are you going to do today
Sierra	no	nothing	nothing
David	No	I made more unit tests for things that could go wrong with logging.	I will be too busy with outside work to work on the project.
Bryant	Yes	Nothing	Nothing
Abhay	Yes	N/A	N/A
Faisal	yes	N/A	N/A

11/4/22	Are you blocked?	What did you do yesterday?	What are you going to do today
Sierra	no	nothing	nothing
David	No	I did not do anything yesterday.	I will try to finish the network diagram.
Bryant	No	Nothing	Work on Registration Sequence Diagram
Abhay	Yes	N/A	N/A
Faisal	No	worked on registration	work on registration and logging

11/5/22	Are you blocked?	What did you do yesterday?	What are you going to do today
Sierra	no	nothing	nothing
David	Yes	I tried to finish up a draft of the network diagram but I was not sure what else to change and add so I made a very few additions and edits.	I will try to finish the network digram and work on registration code.
Bryant	No	Work on Registration Sequence Diagram	Fix errors in Registration Sequence Diagram
Abhay	Yes	N/A	N/A
Faisal	no	work on registration Sequence Diagram	work on logging

11/6/22	Are you blocked?	What did you do yesterday?	What are you going to do today
Sierra	no	nothing	nothing
David	No	I finished the network diagram and began making changes to registration by adding more required data to register.	I will try to work on the data access layer between the registration and the database.
Bryant	No	Fixed Errors in Registration Sequence Diagram	Complete Registration Sequence Diagrams
Abhay	No	N/A	Implement Logging
Faisal	No	worked on Logging	work on logging

11/7/22	Are you blocked?	What did you do yesterday?	What are you going to do today
Sierra	no	nothing	Reggistration implementation
David	Yes	I was unable to get a working connection between registration and database.	I will make more test for the new required data and rebuild old test to fit the new requirements of logging being changed to asynchronous.
Bryant	No	Complete Registration Sequence Diagram	Rough Draft and get feedback on Logging Sequence Diagram
Abhay	No	Implemented a logger, tested connectivity to a database (no adhereing to SOLID)	Change the Logger to adhere to SOLID
Faisal		work on logging	commit a loging class library to github

11/8/22	Are you blocked?	What did you do yesterday?	What are you going to do today
Sierra	no	Registration implementation	Registration implementaion
David	Yes	I was able to make new tests but not sure how to test all aspects of asychronous logger to avoid errors like opening too many threads if the system makes many logs at once.	I will be trying to finish up all the final connections between logger and registration while trying to make it follow SOLID standard.
Bryant	No	Rough Draft and get feedback on Logging Sequence Diagram	Change naming convention in LLD to follow coding standards, fix logging sequence diagram, combine and format in LLD documen
Abhay	No	Implementing the SOLID principle for the Logger	N/A
Faisal	no	worked on logging	work on logging

11/9/22	Are you blocked?	What did you do yesterday?	What are you going to do today
Sierra	no	Registeation Implementation	Finish registration
David	No	I worked on finalizing the project to make sure everything works together.	I will go over all work and see if i find any mistakes that i could change or fix. I will also check over the coding standards.
Bryant	No	Change naming convention in LLD to follow coding standards, fix logging sequence diagram, combine and format in LLD doc	Complete LLD and fix any minor errors.
Abhay	No	N/A	Do testing for the Registration and Logging
Faisal	no	worked on logging	worked on logging

Sprint 6 Retrospective

11/3/22 - 11/9/22	Did you finish?	What did you do well?	What went wrong during the sprint?
Sierra	No	Implemenetd the main functionalitieis for regsitration	I was confused as to how to access data and connect to the database for testing.
David	No	I finished the Network Diagram completely and was able to build a large part of registration, help with some logging code, and create a few more tests to check new features added.	There was too little time and alot of confusion in the begining on how to implement code which led to redundant work and rewrites which slowed down everything. I did not have enough time to make everything the way I wanted and had to scrap Ideas for bonus features like validating email.
Bryant	Yes	I created descriptive sequence diagrams for sucess and failure cases. I also added clarification and additional information in	Work items were rushed this sprint. Had to make lots of minor changes to each individual diagram which slowed down work produ
Abhay			
Faisal			

11/3/22 - 11/9/22	If not finished what were the tasks that are uncompleted?
Sierra	I was not able to connect and access database
David	I was unable to polish code and add extra security and privacy features that I would have liked to.
Bryant	N/A
Abhay	
Faisal
